

I love XM radio and its offerings. I am excited about my upcoming choices of content that XM will provide in the future. DO NOT TAKE AWAY MY CHOICES. Xm is an innovative and new approach to audio content that I love. America is about competition that the free market allows for. To regulate and stop this is wrong. XM made a risky and bold move to newer technology, great service, and great content. Just because local radios stations refuse to evolve does not mean that the consumers should suffer. Do not allow regulations on XM for local type content.
